

Technical Data Sheet: EXP-BW 655

EXP-BW 655 is an experimental concentrated emulsion of beeswax having 100% biobased content. It provides excellent lubricity, water vapor barrier and hydrophobic properties for personal care formulations.

Property	Specification
Appearance	Opaque white liquid
Solids Type	Beeswax
Wax melt point	62°C
Emulsifier charge	Anionic
Non-volatile content	30%
pH	8
Viscosity	100 cps
Mean Particle size	Approximately 1 micron

Note: EXP-BW 655 displays excellent shear stability and can be transferred or processed without special handling requirements.
